*Local impacts of
climate change*

Policy

1. *Ban on combustion-car engines*
2. *Carbon tax w/ cash transfers*
3. *Green infrastructure program*

Climate + Policy

+

Local climate impact

With the mix of more hurricanes, rising sea levels, more heatwaves, and lower agricultural output

Green infrastructure program

In the US, such a programme could create 4 million jobs in green sectors, such as public transportation, renewable power plants, buildings' insulation, or sustainable agriculture.

Ban on combustion-engine cars

so that only electric or hydrogen vehicles can be sold after 2030.

Carbon tax with cash transfers

To compensate people for the higher prices, the revenues of the carbon tax would be redistributed to all households, regardless of their income.

Background of respondent:

Socio-demographics, political views, energy use, consumption habits.

Open-ended question:

Main considerations about climate change; supported climate policies.

Climate: local impacts

Policy: info on 3 important policies

Both: Climate + Policy

Knowledge

Factual, quantitative questions on climate dynamics, factors and impacts of climate change, footprints.

What part of climate change do you think is due to human activity?

None

A little

Some

A lot

Most

Which source of electric energy emits the most greenhouse gases to provide power for a house?

Please rank the items from 1 (most) to 3 (least) (by clicking and dragging the items).

Gas-fired power plant

Nuclear power plant

Coal-fired power station

To what extent do you think that it is technically feasible to stop greenhouse gas emissions while maintaining satisfactory standards of living in the U.S.?

Not at all

A little

Moderately

A lot

A great deal

Background of respondent:

Socio-demographics, political views, energy use, consumption habits.

Open-ended question:

Main considerations about climate change; supported climate policies.
