

Heterogenous Treatment Effects & Policy Views Decomposition

Countries: US, France, Denmark, Germany

October 2021

Heterogenous Treatment Effects

Main Results

- Negative effect of Climate Treatment on right-wing respondents for support on policies, but policy treatment has positive effect on willingness to adopt climate friendly behavior.
- Both treatment have a negative effect on left-leaning people.
- Policy treatment has a negative effect on both right- and left-leaning people on thinking that rich people are responsible for CC
- Climate treatment has strong effects on the main origin/race of the country.
- Also strong effects of both treatments on retired people and older people.

Decomposition of Policy Views

Main Results

- Political leaning and age are important drivers of support.
- Belief in efficiency is key.
- Thinking that climate change will/is affect(ing) oneself is much more important than being actually vulnerable to climate change.
- Partisan gap is also explained by different views on the efficiency of climate policies, as well as the importance of addressing poverty and inequalities, and not so much by objective characteristics (e.g., being vulnerable to CC or financially constrained).
- The geographical gap is largely explained by feeling affected by CC.
- Being concerned about climate change only plays a secondary role.

Variance Decomposition – Individual Characteristics

$$R^2 = 9.34\%$$

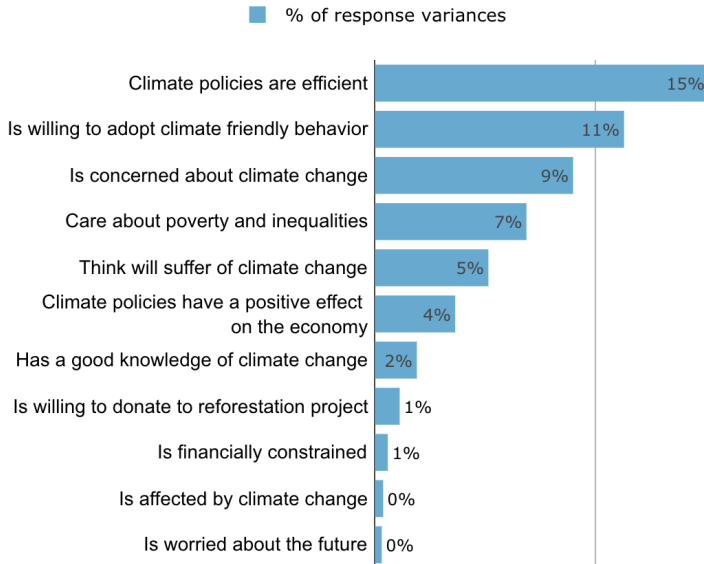

Variance Decomposition – Individual Characteristics and Indices

$$R^2 = 64.75\%$$

Variance Decomposition – Indices

$R^2 = 64.75\%$ Analysis adjusted for 20 regressors (the controls) that make up 9.34 pct. pts of R^2

Decomposing Policy View – Individual Characteristics

Decomposing Policy View – Mechanisms

Notes: We show the coefficients on the different policy views from the regressions of each policy index on these factors, controlling for the full array of individual covariates and

Gelbach decomposition of the partisan gap in support for...

... all climate policies

Explaining the Partisan Gap

Gelbach decomposition of the partisan gap in support for:

(a) Ban on combustion-engine cars

(b) Carbon tax with cash transfers

Explaining the Partisan Gap

Gelbach decomposition of the partisan gap in support for:

(a) Green investment program

(b) All 3 policies

Gelbach decomposition of the geographical gap (urban vs. rural) in support for... ... all climate policies

Explaining the Geographical Gap

Gelbach decomposition of the geographical gap (urban vs. rural) in support for:

(a) Ban on combustion-engine cars

(b) Carbon tax with cash transfers

Explaining the Geographical Gap

Gelbach decomposition of the geographical gap (urban vs. rural) in support for:

(a) Green investment program

(b) All 3 policies
